Index

A

acoustic wave 65, 78, 79
action variable 97
adiabatic equation of state 33, 42-44
adiabatic invariant 97, 103
Alfvén mode 85, 89-91, 94, 106, 177
Alfvén speed 4, 87
Alfvén wave 84, 91, 97, 99, 177-178
Ampere's law 169
analytic continuation 121
analytic function 121, 187
astrophysics 68
average velocity 8, 10, 13, 25, 27, 29, 35

B

BBGKY Hierarchy 48-49
Bessel function 157, 191-192
Bogoliubov, N. N. 49
Boltzmann constant 8, 10
Boltzmann equation 19, 23, 45, 186
Boltzmann relation 1, 10-12
Born, M. 49
bounce motion 97
bounce period 129
branch point 130-131, 188-189
bulk velocity 13, 35

C

CGL double adiabatic equation of states 43-44
Chao, J. K. 17, 31, 43-45, 90, 95
characteristic curves 23, 113-114, 152, 185
charge density 3, 14, 25, 35, 58, 120
Chen, F. F. 1, 17, 25, 45, 51, 83, 85, 95, 97, 112, 117, 135, 137, 144-145, 163
Chen, M. Q. 17
Chew-Goldberger-Low theory 43, 45
Chew, C. F. 43-45
collision 1, 16, 23, 45, 185-186
collision frequency 16
collisionless plasma 58, 177
collisionless shock 45, 95
compressional Alfvén mode 85
contact discontinuity 17, 90
Conte, S. 194-195
continuity equation 25, 31-32, 36, 40-42, 45, 52-53, 56, 86, 89, 138
cross-product matrix 57
current density 3, 35, 104, 166
curvature drift 97, 100-101, 103, 105, 179-180
cut-off frequency 51, 60, 62, 65, 67-68, 71-73, 75, 77, 79, 82

D

Debye length 1-2, 11-13
Debye shielding 1-2, 11-13
Debye sphere 12-13
degrees of freedom 57
diamagnetic current 97, 103-106
diamagnetic drift 97, 103-104
dielectric function 120, 129
dielectric tensor 51, 58-59, 74, 77
dispersion curve 66, 73, 78-79, 81-82
dispersion relation 51, 58, 60, 62-63, 65-69, 71-74, 76-77, 80-82, 90-92, 113, 117, 126, 129, 137-138, 145, 194
Doppler shift 137, 141
dynamic pressure 27

E

$\mathbf{E}\times\mathbf{B}$ drift 97-99, 106
E-region 99
eigen mode 85, 89
eigen value 58, 88
eigen vector 58, 88
electric pressure 4
electrostatic instabilities 135, 144
energy 1, 4, 8-9, 11-12, 25, 101, 103, 135
energy equations 25, 31-33, 37, 40-43, 45, 56, 86, 169
energy flux 25, 28, 36
ensemble average 22-23, 185
entropy 25, 28, 29
entropy mode 74, 76-77, 85, 89-90, 94
equatorial spread F (ESF) 100
equilibrium distribution 114, 117, 145,

152
equilibrium Maxwell's equations 146, 151
equilibrium solution 113-116
equilibrium state 2, 14, 32, 34, 51-56, 90, 113
equilibrium Vlasov equation 147, 151
error function 193
extra-ordinary wave mode 69, 71

F

Faraday rotation 51, 68
Faraday's law 110, 170, 173, 176
fast mode 85, 89-94, 106, 177-178
fluid drift 103, 105
fluid equations 10, 25, 27, 29, 31-32, 129
fluid variables 25, 27, 29, 32
Formisano, V. 51, 82-83
Fourier transform 118-119, 138, 146, 151, 153
Fried, B. F. 194-195
Friedrichs diagram 85, 94-95
frozen-in flux 42, 85, 173-175, 178

G

Gardner, C. S. 134-135
Gardner's theorem 117, 134
Gaussian units 1-7, 13, 15, 34, 40, 45
generalized Ohm's law 25, 39-40, 42, 169, 172
Goldberger, M. L. 45
Goldstein, H. 97, 112
gradient B drift 97, 102-103, 105, 181-182
gravitational drift 97, 100
gravitational Rayleigh-Taylor (GRT) instability 100
Green, H. S. 49
Green's function 165
growth rate 137, 139, 141-142
guiding center 98-102, 179, 181
gyro frequency 1, 4, 15-16
gyro period 42, 98-102, 106, 179
gyro radius 1, 15, 42, 98

H

Hall-MHD Ohm's law 172
Hall current 99
heat flux 25, 27-28, 32, 34, 36, 42, 44-45, 51-52, 85-86

I

ionosphere 99-100, 112
intermediate mode 85, 89-91, 177
interplanetary 45, 95, 99
inverse-Fourier transform 118
inverse-Laplace transform 119-125, 187
isotropic pressure 9, 27, 33-34, 44-45, 51-52, 85-86, 105, 171

J

Jacobian determinant 113

K

Kan, J. R. 51, 84
Kantrowitz, A. 90, 94-95
Kelley, M. C. 100, 112
Kelvin-Helmholtz instability 95
Kennel, C. F. 51, 82-83
kinetic energy 8, 11-12, 101, 103
kinetic energy flux 28, 36
kinetic pressure 27, 35
Kirkwood, J. G. 49
Klimontovich equation 19-20, 47, 183-184
Krall, N. A. 1, 17, 25, 46-47, 49, 51, 84-85, 95, 97, 112-113, 116-117, 135, 137, 141, 144-145, 150, 163

L

L-mode wave 62, 67-68, 72
Lai, S. H. 95
Landau, L. D. 121, 135, 174-175, 178
Landau contour 117, 121-125, 187, 194
Landau damping 117, 128-129
Langmuir wave 60, 62, 65-66, 71, 79
Laplace transform 118-119, 138, 146, 151, 153
Larmor radius 1, 15
Lifshitz, E. M. 174-175, 178
Liouville equation 47-48
longitudinal wave 51, 58, 65, 73, 107
Longmire, C. L. 105, 112
loss-cone distribution 97-98

Low, F. E. 45
Lyu, L. H. 17, 51, 84, 95

M

magnetic moment 97-98, 100, 102, 105, 179, 181
magnetic pressure 4, 177
magnetization current 97, 103, 105
magnetized plasma 1, 51, 66, 69, 77, 79, 97-98, 151, 191
magnetopause 105
magnetosheath 43-44
magnetotail 99
mass density 25, 35, 104
Mathews, J. 187, 189, 191, 195
method of characteristics 145, 152
MHD approximation 173
MHD equations 25, 45, 85-86
MHD Ohm's law 25, 42, 45, 85-86, 170, 173, 176-177
MHD phenomena 42
MHD plasma 35, 42-45, 85-86, 88-91, 95, 106, 170, 175, 177-178
MHD wave 82, 85, 94, 178
microscopic distribution function 19-20, 183-184
microscopic electric field 19, 183
microscopic magnetic field 19, 183
mirror machine 97-98
mirror motion 43
mirror point 97
mobility tensor 51, 56-57, 59-60, 63, 74, 77
momentum 9, 25, 35, 43, 110-111
momentum equation 10, 25, 31-33, 36, 40-41, 45, 56, 79, 86, 103-104, 138, 171, 175
momentum flux 25, 27

N

Nicholson, D. R. 1, 15-17, 19, 23, 25, 46-47, 50-51, 84-85, 95, 97, 112-113, 116-117, 129, 133-135, 137, 144-145, 163, 187, 189
number density 2, 8, 10, 13, 25, 27, 29, 103-104, 137, 193
Nyquist method 117, 127, 129, 132, 188

O

O-mode wave 62, 69, 73, 76
Ohm's law 25, 31, 38-40, 42, 45, 85-86, 169-170, 172-173, 176-177
Olbert, S. 31, 46
one-fluid equations 25, 31, 35-41, 45, 103-105, 172
one-fluid variables 35
ordinary wave mode 69

P

parallel propagation 51, 66, 68, 72, 77, 80-81
partial differential equation 113
partial ring current 101
Penrose Criterion 117, 135
Penrose, R. 117, 135
periodic motions 97-98, 103
perpendicular propagation 51, 72-73, 80-82, 90, 178
Petschek, H. E. 90, 94-95
pitch angle 97-98
plane wave 54, 56, 60, 63, 85, 95, 138, 147, 151
plasma dispersion function 194-195
plasma frequency 4, 14-16, 141
plasma oscillation period 42
plasma parameter 1-2, 13
plasmapause 105
plasma sheet 99
plasma sheet boundary layer (PSBL) 105
plasmasphere 99
plasma tail of a comet 99
Poisson equation 11, 57, 117-118, 120, 138, 165
polarization 51, 68, 72-73
polarization current 97, 106
polarization drift 97, 106-107
ponderomotive force 97, 107-108, 110, 112
pressure equation 31-32
pressure gradient 65, 103, 105
pressure tensor 25, 27, 35

R

R-mode wave 62, 67-68, 72
relativistic Klimontovich equation 183-184
relativistic plasma 9
relativistic Vlasov equation 183, 185
residue 121-123, 187-188
resonance 77, 80
resonant frequency 51, 60, 62, 72-73, 75, 77, 79-80
resonant condition 137
Riemann surface 188-189
ring current 101, 103
Rossi, B. 31, 46
rotational discontinuity 84, 90-91

S

scalar pressure 25
shear-Alfvén mode 85, 89
shock waves 45, 90, 95
SI units 1-7, 13, 16, 34, 40, 45
solar physics 68
solar wind 84
slow mode 85, 89-94, 177
sound speed 87
Stix, T. H. 56, 84
Stringer, T. E. 51, 82, 84, 137, 141, 144
Sturrock, P. A. 133, 135

T

tangential discontinuity 90
temperature 1-2, 8-11, 13, 29, 65, 72, 105-106
thermal energy 1, 9
thermal pressure 1-2, 8-9, 25, 27, 29, 103-104, 177
transverse wave 51, 58, 65, 69, 73, 107, 177
Trivelpiece, A. W. 1, 17, 25, 46-47, 49, 51, 84-85, 95, 97, 112-113, 116-117, 135, 137, 141, 144-145, 150, 163
Tsai, T. C. 10, 17
Tsai, W. H. 17
two-fluid equations 25, 32, 51-52, 55, 79, 138, 172
two-stream instability 137, 141, 142

U

unmagnetized plasma 1, 65-66, 69, 71, 77, 79, 80

V

Vlasov, A. A. 23
Vlasov equation 10, 19, 22-23, 25-26, 29, 31-32, 47, 49, 113-118, 145-147, 151, 183, 185-186
Vlasov simulation 17

W

Walker, R. L. 187, 189, 191, 195
wave equation 113

X

X-mode wave 62, 69, 71-73

Y

Yvon, J. 49-50

Z

Z-mode wave 62, 69, 71-73
