

## **Solar Physics Lecture Notes**

**by Ling-Hsiao Lyu / 2007 Fall**

### **Table of Contents**

**Lecture 0:** Introduction to Solar Physics

**Lecture 1:** The Solar Interior: The Interplay Among the Gravitational Force, Pressure Gradient Force, the Coriolis Force, and the Electromagnetic Force

太陽的一生 與 太陽的內部結構

暗星雲與亮星雲 見證著 星星的生與死

霹靂說與星系分布的觀測

全華高一地科第三章草稿

**Lecture 2:** The Solar Atmosphere and Solar Cycle: Yahkoh, SoHO, TRACE, and Ground Observations

2.1 光球層上的現象：黑子與米粒組織

2.2 色球層附近的現象：日珥以及日珥噴發所造成的太陽閃焰與日冕物質拋射

2.3 日冕、日冕洞、與太陽風

2.4 日出人造衛星觀測影片

Lecture 3: Instabilities in the Solar Interior and in the Solar Atmosphere

Lecture 4: Structures and Distributions of the Solar Prominences / Filaments

Lecture 5: On the Cause of Solar Differential Rotation

Lecture 6: Living With a Star: Solar Wind, Coronal Mass Ejection, Magnetic Cloud, and Solar Flare
