Petersburg, Russia

Time : 106 年 1 月 19 日 星期四 11:00

Place : 健雄館(科四館) S4-917 教室

摘要/Abstract :

The ISON project is an open international project under control of the Russian Academy of Sciences, mainly devoted to near-Earth's object observations using the worldwide network of small and medium optical telescopes, orbital calculations and predictions. Moreover, the network facilities frequently used for registration of gamma-ray burst afterglows.
